Efficient electoral processes

Simplified Total Vote Suite (STVS) is a comprehensive technological solution that combines a web platform and a mobile application, designed to efficiently, securely and transparently manage the various stages of the electoral process, ensuring full traceability throughout.

STVS Web

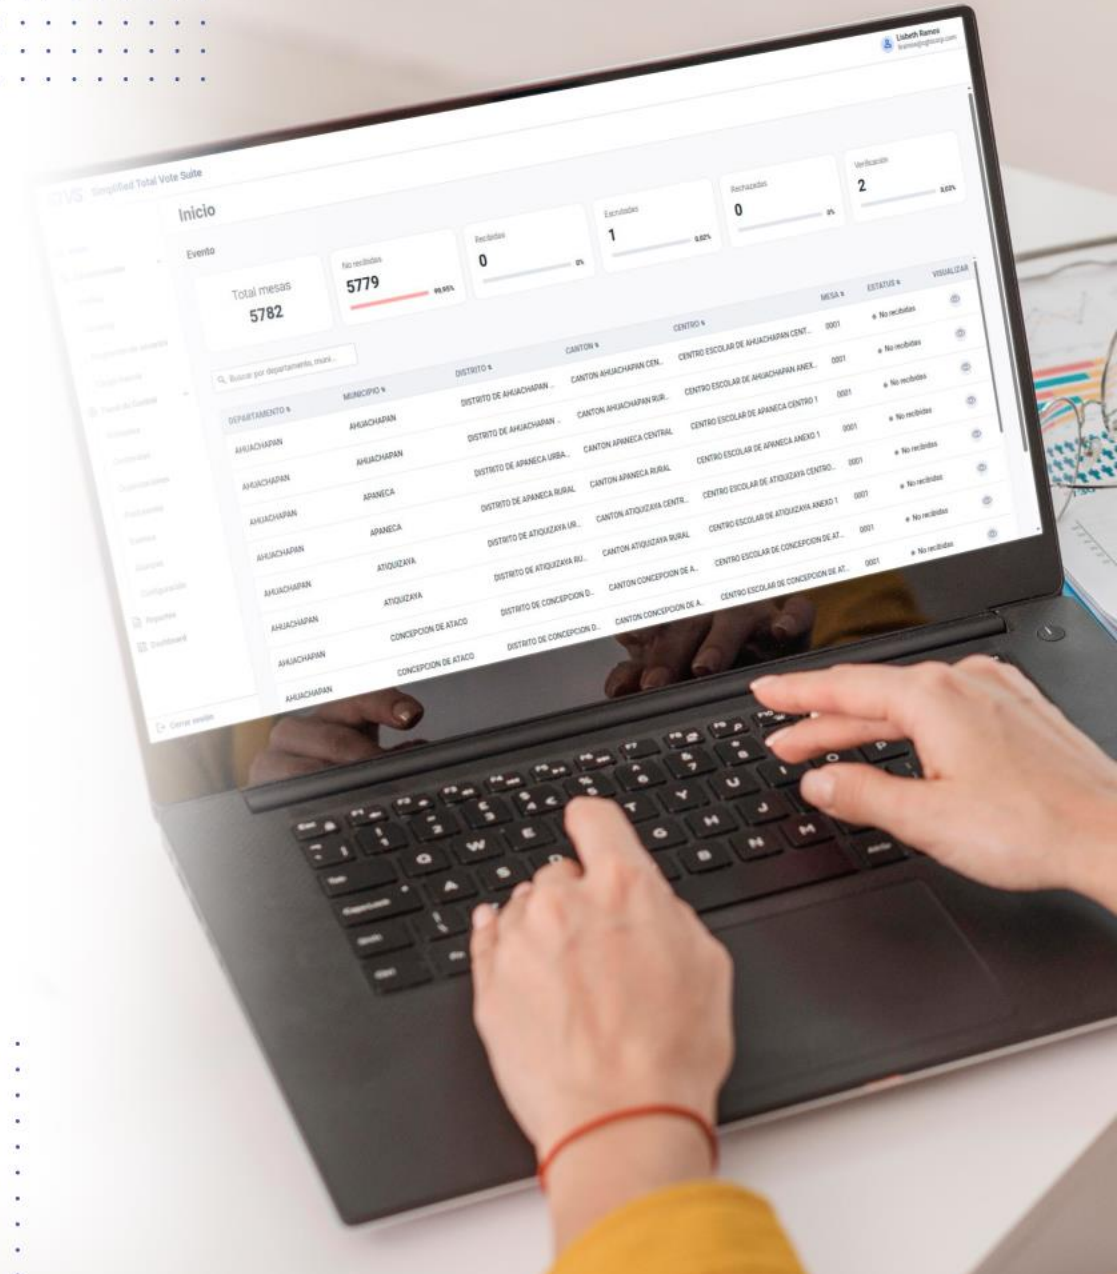

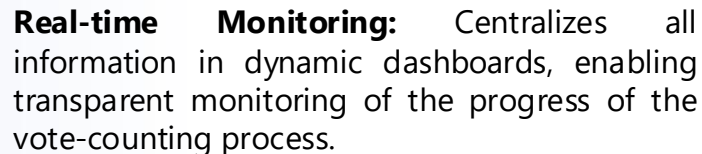

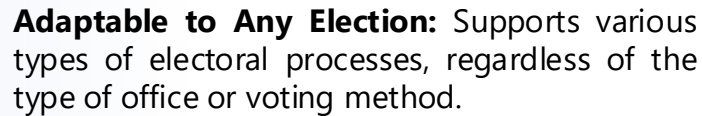

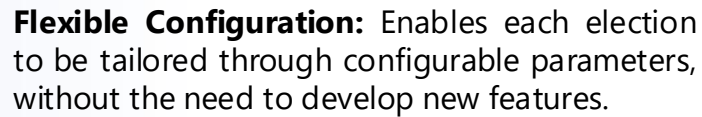

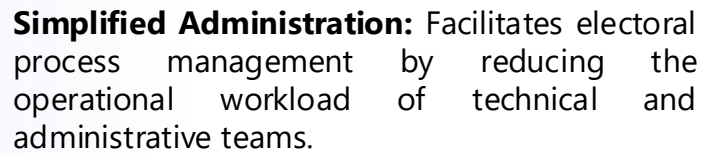

It is the administration and control center from where the electoral process is configured, users are managed, operations are monitored in real time, and results are consolidated for analysis and publication.

STVS Móvil

It extends operations into the field, enabling electoral information to be captured, validated, transmitted, and accessed directly from mobile devices, ensuring speed, availability and continuity throughout the data flow.

STVS Web - The Control Center of the Electoral Process

STVS Mobile - Electoral Operations at Your Fingertips

Processing Flexibility: Enables the capture and transcription of electoral tally sheets either independently or jointly, depending on the strategy defined for each election.

Electoral Versatility: Compatible with single-member, multi-member, and other voting systems.

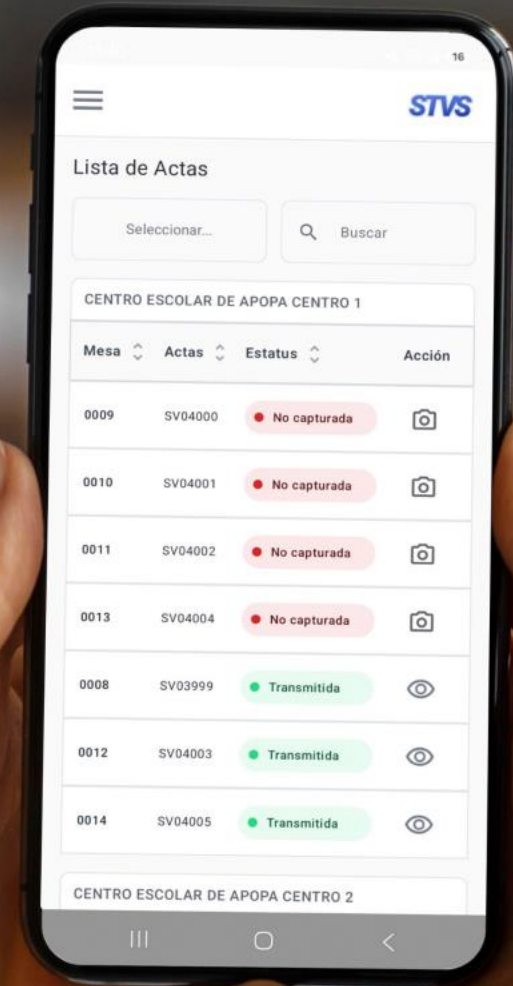

Available from Anywhere: Operates on smartphones equipped with a camera and meeting the minimum technical requirements.

Advanced Security: Ensures the integrity of the process through biometric authentication linked to the authorized device.

Information Management: Enables immediate viewing of all tally sheets captured and transmitted in real time.

How Does STVS Add Value During an Election?

1

Before the election

The electoral event is configured through the web platform, users are registered, and the polling stations and voting tables available on each device are assigned.

2

During Election Day

Tally sheets are captured and transcribed through the mobile application.

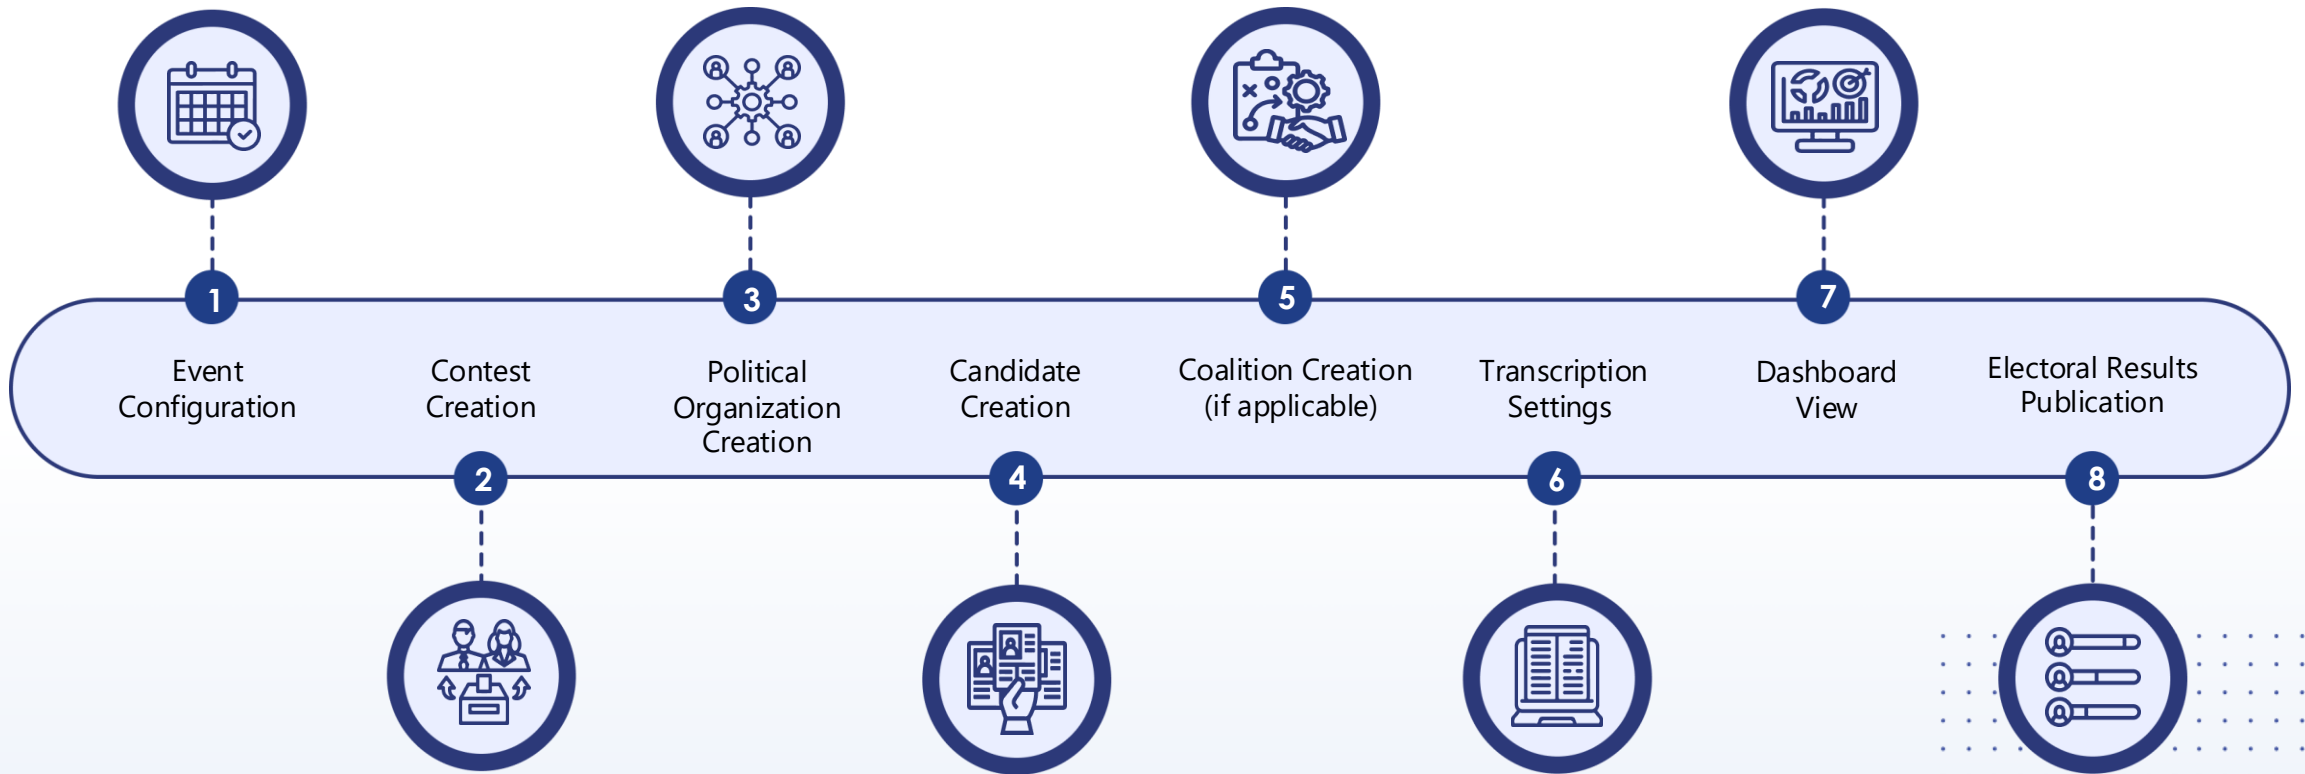

The information is automatically transmitted to the web platform, where it is validated, consolidated, and aggregated, while the monitoring dashboards and real-time results publication platform are continuously updated.

3

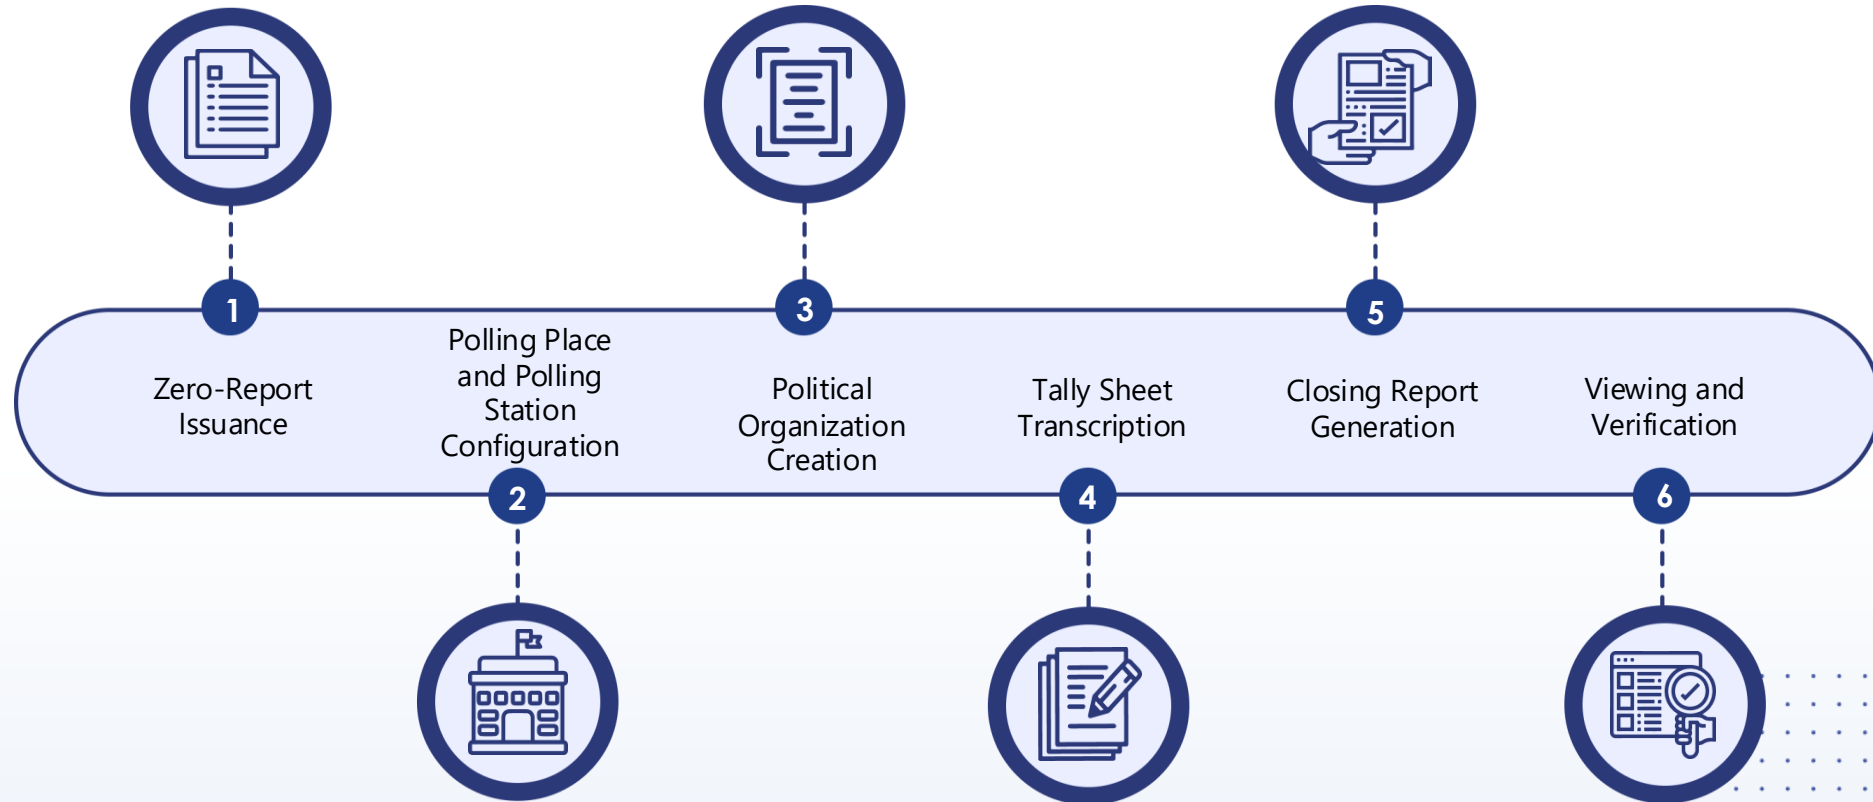

After Polls Close

The web platform publishes the final results and securely retains the original tally sheets for reference, audits, and verification processes.

How Does STVS Web Work?

How Does STVS Mobile Work?

We're just a click away!

Discover how STVS can enhance the transparency, efficiency, and reliability of your electoral processes.
